<b>Profile:</b>	<p>Building on the principles of business consulting Version-X is an adviser and domestic supplier of IT- and Telecom Services. The business approach is customer oriented specializing in fulfillment of customer needs rather than specializing on certain products.</p> <p>The company provides full service capability to support all products sold through direct sales. A help desk service is available for the “Software-OnlineShop” where selected business software is offered online.</p> <p><b>Software</b> Distribution partner of companies such as Diskeeper, Steema, Component One and more. Reseller and /or affiliate for many other renowned software developers. In the past the company developed its own software solutions for example Ninive School Management System still used by schools throughout Austria.</p> <p>Large enterprises and government organizations are serviced by “VX License Service” a process where Version-X acts a purchaser of software licenses and cares about maintenance contracts for those companies interested in optimizing their TIC/TOC . These services are provided also in co-operation with some of Austria’s largest IT houses.</p> <p><b>Web design and Hosting</b> VX WebPower, the Web-service package of Version-X helps small and medium sized companies to start up with e-commerce at low cost. The services range from Web –design, -production, - maintenance and - hosting, up to shop and B2B solutions.</p>
